## 1. Getting started

The chapter shows some basic instructions how to set up the IN-Motion WordPress Theme.

### 1.1 Installing the IN- Motion theme

To set up the IN- Motion theme follow the steps below:

1. if you don't have the WordPress installed, then installed it
2. add the IN- Motion theme to your Wordpress. You have two options to do this (choose only one of this steps):
  - using some FTP program. You upload the folder *in-motion-package/in-motion* to your server *wp\_instalation\_folder/wp-content/themes*
  - the second option is to install the theme using WordPress Upload. To do this go to *Appearance > Themes > Install Themes > Upload* and upload the file from *in-motion - package/ in-motion.zip*
3. go to admin to activate the theme
4. install plugin OptionTree from (<http://wordpress.org/extend/plugins/option-tree/>) and activate it
5. go to left sidebar *OptionTree > Settings > Import* and go to section *Settings* . It the *Settings* textarea input the content from *in-motion-package/like-in-preview/ settings-2-0-10.txt* and click *Import Settings*

## 1.2 Setting the website as it is on Themeforest preview

To set up the IN- Motion theme as it is on the Themeforest preview follow the steps below:

1. before this chapter make sure to finish chapter 1.1 Installing the IN- Motion theme
2. go to left sidebar **OptionTree > Settings > Import** and go to section **Theme Options** . It the **Theme Options** textarea input the content from *in-motion-package/like-in-preview/theme-options-2-0-10.txt* and click **Import Theme Options**
3. last thing you have to do is import XML file *content.xml* to your WP. This file can be found in *in-motion-package/like-in-preview/content.xml*. This file makes all pages, posts and everything else that is in preview on ThemeForest. Go to **Tools -> Import**. Then choose **Worpdress plugin for importing XML file -> install it**. When installation fis finished click on *Activate Plugin & Run importer*. Find file in *in-motion-package/like-in-preview/content.xml* and that is!!!

## 2. Using *IN-Motion* theme »templates«

In-motion theme doesn't have ordinary templates like you may be used to from other pages. When creating each page you can see the page option »Choose page template«, where you can choose one of the templates.

There is also a question »Show your page in menu?« where you check yes if you want your page to be displayed in the menu.

To set up the order page type the order in the Page Attributes area.

### 2.1 Setting up the home page

To set up the homepage you must create a new page. To do this go to [Pages > Add New](#). You set the page title to »Home« or your own name. You can create the page content by writing in the page area or you can choose one of the Home template given by the In-motion theme.

The given home template gives you settings options that are seen on the picture below.

Slider

Moving with modern trends!

## 2.2 Setting up the news

Theme also offers you a »news« template. With this you can create a page that has you news on it. To write a news mark a Post as a News type. The option is given under the content box of the post.

## 2.3 Setting up the portfolio

To set a page as a portfolio page, choose portfolio template. This will read all your portfolio posts(you can create them by choosing the »Portfolio« on the left sidebar of the admin window. The outcome of the portfolio will be as seen on the demo.

## **2.3 Setting up the blog**

To set a page as a blog page, choose blog template. This will read all your blog posts (you can create them by choosing the »Posts« on the left sidebar of the admin window. The outcome of the blog will be as seen on the demo.

## **3. IN-Motion theme options**

### **3.1 General settings of the theme**

To set up the general settings for the website go to left sidebar [Appearance -> Theme Options](#) and choose the [General](#) tab as shown on picture below.

### Background repeat

Repeat

Choose how you want the background image to repeat...

### Social Icons

Facebook

Twitter

Digg

Set your social network icons...

Add Slide

### Slide In Header Title

Latest news

### Google Analytics

Insert Google Analytics code for analyzing your page...

### Heading h1 size

Type the size for heading h1.

### Heading h2 size

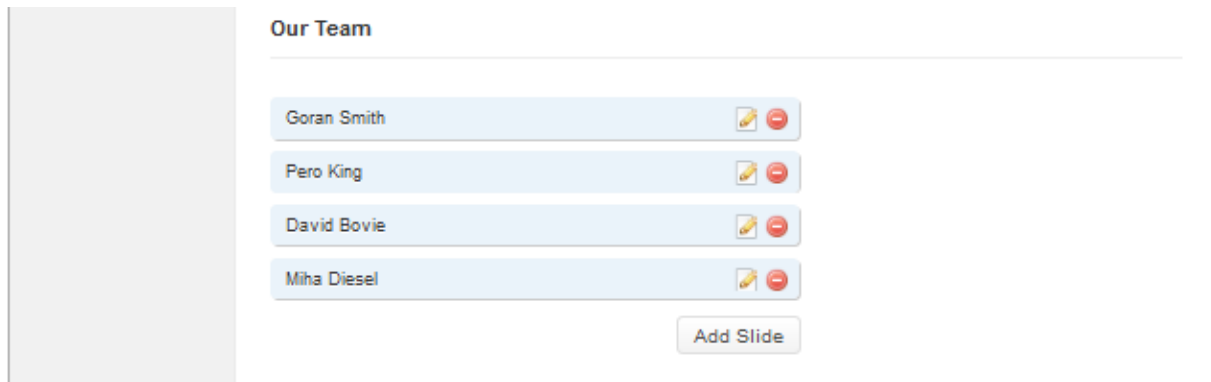

Type the size for heading h2.

### Heading h3 size

Type the size for heading h3.

### Heading h4 size

Type the size for heading h4.

## 3.2 Setting up the main menu

The menu of the IN-Motion theme isn't a standard menu. So you don't have to create a menu in the Appearance toolbar. The menu will create itself from all the created pages that have a »Show in menu?« set to »Yes« (the option is found under the content box of each page).

## 3.3 Adding portfolio Categories

Go to left sidebar **Portfolio > Portfolio categories**. Write the name of the category and click **Add New Category**. This category will display beside the portfolio and will be used as a filter.

## 3.4 Adding portfolio Items

To add a portfolio item go to left sidebar **Portfolio > Add New**. You can choose the type of the portfolio. Options are **Image**, **Video** and **Slideshow**. You can also enter the Client and the URL for the portfolio.

### 3.4.1 Image portfolio

To create an image portfolio set the featured image. The image will be resized to fit the container. The featured image is set by uploading the picture using the media upload.

### 3.4.2 Video portfolio

To create a video portfolio choose the dropdown type »Video«. Fill the Video Url textarea with the embed code of the video. You must also set the featured image to be displayed. Width and height are set in the entered video embed code. The ideal width of the video is 570px. Example code:

```
<iframe src="http://player.vimeo.com/video/22556709?title=0&byline=0&portrait=0"
width="570" height="300" frameborder="0" webkitAllowFullScreen mozallowfullscreen
allowFullScreen></iframe>
```

### 3.4.3 Slideshow portfolio

To create a slideshow portfolio add more than one image. One is set as featured image while others, including the featured image, will be displayed in the slideshow.

## 3.5 Custom widgets

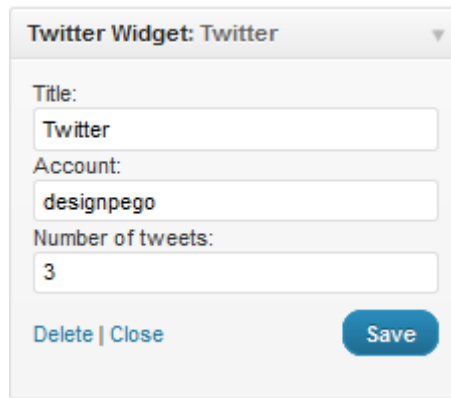

### 3.5.1 Post widget

The post widget gives the option to show your recent posts in the widget area. You set the title of the widget and the number of posts.

### 3.5.2 Twitter widget

The Twitter widget gives the option to show your recent tweets in the widget area. You set the title of the widget, the Twitter account and the number of tweets.

**Twitter Widget: Twitter**

Title:  
Twitter

Account:  
designpego

Number of tweets:  
3

Delete | Close Save

### 3.5.3 Flickr widget

The Flickr widget gives the option to show your Flickr images in the widget area. You set the title of the widget, the Flickr username and the number of pictures.

**Flickr Widget: Flickr Widget**

Title:  
Flickr Widget

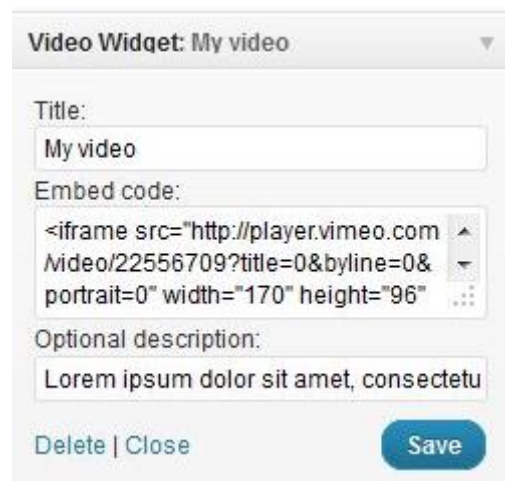

Flickr username:  
62421008@N06

Number of pictures:  
9

Delete | Close Save

### 3.5.4 Video widget

The video widget gives the option to show a video in your widget area. You set the title of the widget, the embed code and the optional description.

**Video Widget: My video**

Title:  
My video

Embed code:  

```
<iframe src="http://player.vimeo.com/video/22556709?title=0&byline=0&portrait=0" width="170" height="96"
```

Optional description:  
Lorem ipsum dolor sit amet, consectetur

Delete | Close Save

## 3.6 Shortcodes

IN-Motion theme gives you an option to set up your own pages by using shortcodes. This shortcodes are:

### 3.6.1 Headings

Heading used in IN-Motion theme are h1, h2, h3 and h4. In the admin panel under IN-Motion tag and tab »General settings« you can redefine their size.

Use:

`[h2] content [/h2]`

### 3.6.2 Columns shortcodes

Column shortcodes options are:

- 1/2 style, use: `[one_half] content [/one_half]` `[one_half_last] content [/one_half_last]`
- 1/3 style, use: `[one_third] content [/one_third]` `[one_third_last] content [/one_third_last]`
- 1/4 style, use: `[one_fourth] content [/one_fourth]` `[one_fourth_last] content [/one_fourth_last]`
- 2/3 style, use: `[two_third] content [/two_third]` `[two_third_last] content [/two_third_last]`
- 3/4 style, use: `[three_fourth] content [/three_fourth]` `[three_fourth_last] content [/three_fourth_last]`

### 3.6.3 Highlights

The use of the highlights is shown below:

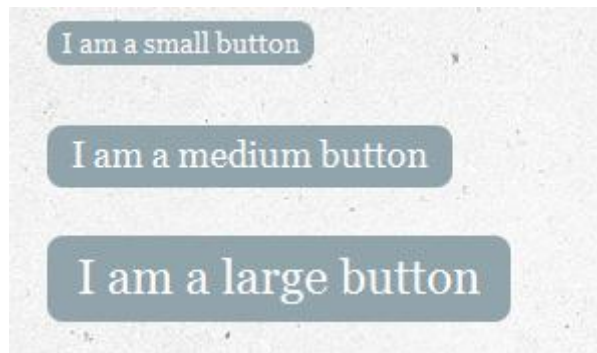

Praesent pellentesque `[main-hl]`suscipit augue`[/main-hl]`, eleifend dapibus nisi tincidunt vel.

Praesent pellentesque `[hl color='black']`suscipit augue`[/hl]`, eleifend dapibus nisi tincidunt vel.

The highlight *main-hl* will highlight the text with the main template color (you can set your own one).

### 3.6.4 Buttons

Shortcode for buttons can be use as shown below:

```
[button type='large' url='http://www.google.com']button text[/button]
```

The default type button is small. Other types are medium and large.

### 3.6.5 Youtube video

Shortcode for Youtube video can be use as shown below:

```
[youtube id=jUe8uoKdHao width=300 height=170]
```

You must set the youtube video id, width and height of the video.

### 3.6.6 Vimeo video

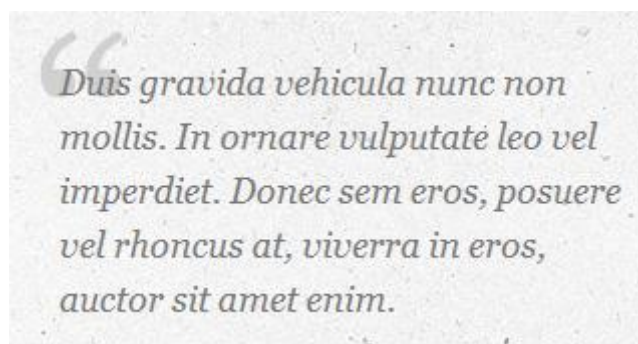

Shortcode for Vimeo video can be use as shown below:

```
[vimeo id=9820827 width=300 height=170]
```

You must set the Vimeo video id, width and height of the video.

### 3.6.7 Quote

The quote shortcode can be use as shown below:

```
[quote] content [/quote]
```

### 3.6.8 List

The shortcode for list offers you an unique list, that is very nice designed and will look amazing on your site.

The list shortcode can be use as shown below:

```
[list]
[list_li] Ivamus ut faucibus elit. Nunc at enim iaculis sapien tincidunt sagittis.[/list_li]
[list_li] Duis ipsum tellus, ullamcorper a dictum sed, laoreet et massa.[/list_li]
[/list]
```

### 3.6.8 Team

The theme also offers you to create a wonderful presentation of your team. You can se it on the demo, in the page About us. You can set the members of the team in IN-Motion settings(admin panel). After doing that you just use shortcode [team], where you want to place the team presentation.

## 4. Translatable ready (.po/.mo)

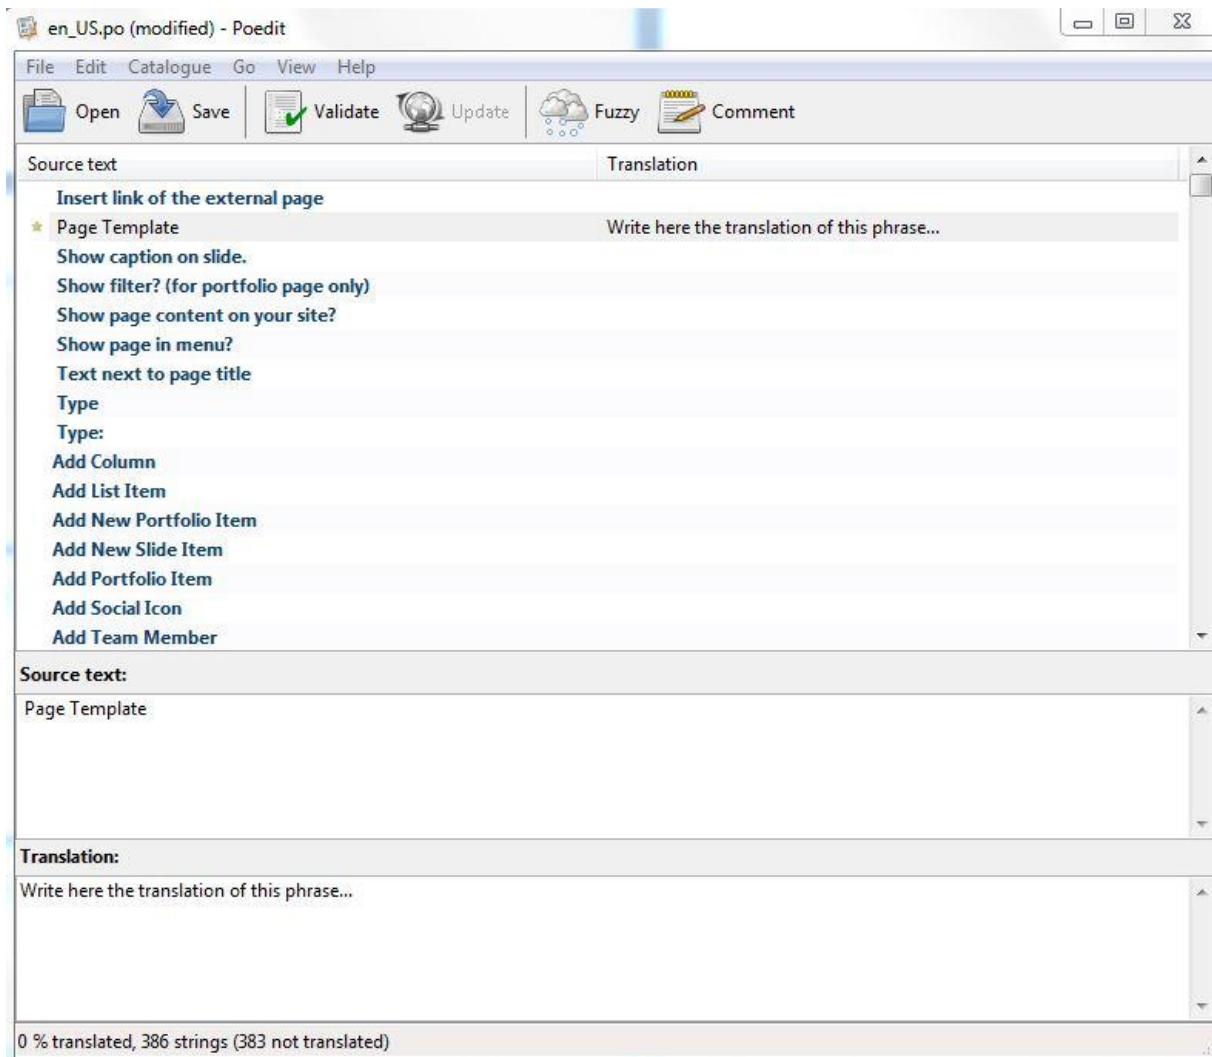

Theme IN-MOTION is translatable ready, files .po/.mo are inlcuded in folder **IN-MOTION-package-u1/in-motion/languages.**

You can see »en\_US.po« and »en\_US.mo«.

### 4.1 Translate

First download some software, we used poedit (<http://www.poedit.net/>).

Then with this software open file called »en\_US.po«. Now you can translate the words.

For example, if you translated into **French language**, then the best way to save the file is **fr\_FR.po**, if to **Spanish language** then save file to **es\_ES.po**, and so on (you can check for this names here [http://www.gnu.org/software/gettext/manual/html\\_chapter/gettext\\_16.html#Country-Codes](http://www.gnu.org/software/gettext/manual/html_chapter/gettext_16.html#Country-Codes) ).

After you saved to .po file will auto be compiled .mo file.

And the last thing to do, go to your root folder of wordpress installatin (not theme installation) and find file **wp-config.php**. Find this line: **define ('WPLANG', '');** For example if you saved file .po to name **fr\_FR** then replace **define ('WPLANG', '');** with **define ('WPLANG', 'fr\_FR');**

Also you can check this great tutorial <http://www.catswhocode.com/blog/how-to-make-a-translatable-wordpress-theme>.

## 5. Theme details

### 5.1. Preview files

Files that are located at *in-motion-package/like-in-preview* are used for setting the In-motion theme so that is exactly like as it is on the Themeforest preview.

### 5.2 »Stuff used«

#### Portfolio filter

The filter used for filtering portfolio items at its categories is: <http://razorjack.net/quicksand/>

## 6. Updates

- IE 8 bug fix
- Clickable main slider
- No caption on main slide ( when are creating new slide, leave title and caption field empty )
- Single portfolio opening update
- Clickable team member
- Default WP jQuery added ( noConflict method )

**Thank you for purchasing IN-Motion WordPress Theme.**

**Hope this document helped you.**
